Profile

- My name is Vitor, I'm 23 years old, and I've been working as a developer for 3 years, creating modern and innovative experiences. I work with several technologies, but I particularly focus on Next, React, and TypeScript. I'm always improving myself to evolve in my career and become a better professional. My goal is to turn ideas that make a difference into lines of code, creating solutions that impact and improve people's lives.

Skills

- JavaScript | TypeScript | React | Redux | React Native | Next | Styled Components | React Hook Form | Zustand | React WebRTC | Sass | Bootstrap | Material UI | PrimeFlex | PrimeReact | jQuery | Git | Lua | Docker | NodeJS | MongoDB | DB2 | SQL Server

Experience

Front-End Developer

Techlise Soluções em Tecnologia

Remote 08/2024 - current

- Developed screens for a financial management platform for pig farms, using Next.js and Chakra UI, implementing forms, images with absolute positioning, listings with CRUD functionalities, among other tasks. Worked on creating the Kanban board component using dndkit, as well as other components like simple and expandable tables, always following the Figma prototype.
- Also developed a calling app using the WebRTC protocol and Socket to enable communication between two devices. Integrated the OneSignal API to send notifications about who is receiving the call, making this functionality possible.

Intern

Techlise Soluções em Tecnologia

Remote 01/2024 - 08/2024

- Developed screens for a doctor's platform using Next.js and Chakra UI, implementing forms, schedules, a point system, listings with CRUD functionalities, among other tasks. Implemented dynamic theme color changes, allowing the user to select or drag a color in the Color Picker to update the system in real-time.
- Managed the application's global state using Redux and also integrated with the API to handle data. Additionally, applied some of these features and design to the mobile app of the system, ensuring a consistent experience on both platforms.
- During development, to quickly create a user, used Puppeteer to automate the login process, user creation, and subsequent login with the created account.

Intern

AVMB - Soluções em TI

Santa Maria, RS, Brazil 03/2022 - 12/2023

- Worked on maintaining portals and creating menus using the company's process modeling tool.
- Responsible for training new interns and developing a training methodology that included short, objective video lessons and exercises that encouraged reflection and research of solutions, teaching them how to use the modeling tool and significantly reducing the learning time.
- Assisted in the development of a mobile app that aimed to bring the main functionalities of an existing web platform in a simplified and agile way.
- Involved in a significant project with extensive use of mobile technologies, consolidating skills in development, implementation, and delivery of innovative solutions.

Education

Systems Analysis and Development Graduate

Unicesumar

Santa Maria, RS, Brazil 10/2022 - ongoing

Projects

- [Bloodhunts Gaming](#): A website developed for the e-sports team BloodHunts Gaming. Built to be responsive and interactive, the site features a modern and functional interface. The platform includes features like 3D carousels, expandable image carousels, and sections about the team's history, important announcements, staff, and the option to register for the newsletter. The site offers dynamic features such as language switching and Instagram content display. User interactions are monitored through analytics.
- [Maurício Scaranto Massoterapia](#): A website designed and developed for massotherapist Maurício Scaranto, featuring a modern, responsive, and interactive design. The platform includes strategic call-to-action buttons and sections dedicated to introducing Maurício, the services he offers, the courses he teaches, and a contact form, allowing potential clients to get in touch directly via email.

Extracurricular Courses

- **Fundamentals of React** - OneBitCode
- **JavaScript Levels I to V** - OneBitCode
- **TypeScript** - OneBitCode
- **Next.js: The Essentials** - OneBitCode
- **Introduction to NodeJS** - OneBitCode
- **Mastering NodeJS** - OneBitCode
- **Mastering MongoDB** - OneBitCode
